The screenshot shows a user interface for 'snip-tool'. At the top, there are three numbered steps: '1 Research', '2 Classify', and '3 Report'. Below this, a section titled 'PHASE 1: ORGANIZATION LOOKUP' contains a heading 'Organization Lookup' and a placeholder text 'Enter the name of the organization'. A search input field with the placeholder 'Enter organization name...' and a button labeled 'Q' are positioned below the placeholder. To the right, there is an 'Assistant' panel with a message: 'I can help you understand the Digital Services Act and your compliance obligations. Ask me anything about the DSA.' At the bottom, there is a feedback section with a placeholder 'Ask about the DSA...' and a button labeled '↗'.

■ PHASE 1: REVIEW FINDINGS

Geographical Scope 1 / 3

The DSA applies to intermediary services offered to recipients in the EU, regardless of where the provider is established. We need to verify the company's connection to the European Union.

Review each finding below. Accept if the information is correct, or edit to provide more accurate details about the company's EU presence.

FINDINGS 0 of 7 confirmed

What is the main establishment country for this company?

Aruba S.p.A. is headquartered in Ponte San Pietro, Lombardia, Italy, and is consistently described as the leading company in Italy for its services.

datacentersmap.com HIGH CONFIDENCE

✓ Accept Edit

What is the eu user base for this company?

Aruba S.p.A. has a total of approximately 5.4 million customers, and it is active in all major European markets including the UK, Germany, France, Poland, Czech Republic, Hungary, and Slovakia.

✓ Accept Edit

What is the use of a language of a member state for this company?

Aruba S.p.A., as an Italian company operating in the EU, is subject to the Italian Consumer Code (Article 9 of Legislative Decree 206/2005) which mandates the use of the Italian language for mandatory consumer information on product labels, a requirement that must align with EU principles on the free movement of goods.

Your DSA compliance classification is ready for review

— — — — —

 **Territorial Scope**
ARTICLE 2 DSA 

Aruba S.p.A. has a substantial connection to the EU under Article 3 DSA. It is established in Italy (headquarters in Ponte San Pietro), has approximately 5.4 million customers across major EU markets (including Germany, France, Poland, Czech Republic), uses the .it top-level domain, and actively targets the EU market with data centers and services. Mere technical accessibility is not the sole factor here; the company's established presence and targeted operations create a clear substantial connection.

 **Service Classification**
ARTICLES 3-6 DSA 

Intermediary Service	 	Online Platform	
Online Marketplace		Search Engine	

Based on the profile, Aruba S.p.A. is described as a 'major Italian web hosting, cloud services, and data center provider.' This core activity of storing data at the request of recipients aligns with the 'Hosting' service category under Article 3(g) DSA. There is no evidence it publicly disseminates information to a significant degree (a key characteristic of an 'Online Platform' under Article 3(i)), nor does it facilitate consumer-trader contracts (a 'Marketplace'). Its services appear to be infrastructure-focused (cloud/hosting as a backend), which falls under the platform exceptions in Recital 13-14. It is also confirmed not to be a search engine.

DSA Compliance Dashboard

Aruba S.p.A.

CLASSIFICATION | APPLICABLE ARTICLES
Hosting | 7

Overview Obligations Company Download

All (8) Applicable (7) Not Applicable (1)

Art.11 Points of contact for Member States' authorities ⓘ
 As a hosting service provider established in Italy with a significant EU customer base, Aruba S.p.A. is in scope of the DSA and must designate a single electronic point of contact for direct communication with authorities from all EU Member States. This contact must be separate from any legal representative and be capable of communicating...
 ≥ 3 action items

Art.12 Points of contact for recipients of the service ⓘ
 As a hosting service provider in scope of the DSA, Aruba S.p.A. must establish and maintain a user-accessible contact mechanism that enables rapid, direct, and efficient electronic communication for its approximately 5.4 million EU customers. This obligation applies regardless of its final classification as an SME, as Article 12 is a core...
 ≥ 3 action items

Art.13 Legal representatives ⓘ
 Article 13 does not apply to Aruba S.p.A. because the company is established within the European Union, specifically in Italy. The obligation to appoint a legal representative is only for providers not established in the EU but offering services to EU users.

Art.14 Terms of service ⓘ
 As a hosting service provider under the DSA, Aruba S.p.A. must integrate clear content moderation policies into its Terms of Service. This obligation requires Aruba to explicitly define prohibited content and user behavior on its infrastructure, such as illegal material or activities that compromise network security, and explain its procedures for...
 ≥ 4 action items

Art.15 Transparency reporting obligations ⓘ
 As a hosting service provider in scope of the DSA, Aruba S.p.A. must annually publish a public report detailing its content moderation activities. This includes statistics on orders received from authorities, notices processed from users, and any actions taken to remove or disable access to illegal content on its infrastructure. The report must be...
 ≥ 3 action items

Art.16 Notice and action mechanisms ⓘ
 As a hosting service provider under the DSA, Aruba S.p.A. must implement a publicly accessible, user-friendly electronic system that allows any individual to submit notices about allegedly illegal content stored on its infrastructure. This system must be easy to find, likely on its main website (aruba.it), and must enable submitters to provide the...
